

ACUA Blink Charging Station User Guide

To provide access to the charging station for ACUA vehicles or guests of the ACUA please follow these procedures:

1. Press "Touch Here" on the display screen.
2. If the user has a Blink Network card they will be prompted to swipe their card and begin charging.
3. If the user does not have a Blink Network card then press "I am not a member" on the display.
4. At this point a QR Code will appear on the display screen, users or an ACUA employee can scan this with a QR reader on their cell phone.
5. After scanning the QR Code the user will receive an authorization number via email, entering this authorization number on the display screen will allow them to begin charging.

Please note that ACUA contract with the Blink Network has recently expired, and as such the Authority is looking for ways to simplify charging station access for all users.
